

TENNESSEE DEPARTMENT OF ENVIRONMENT & CONSERVATION AIR POLLUTION CONTROL DIVISION

PLANTWIDE APPLICABILITY LIMIT (PAL) WORKSHOP

To assist the **regulated community and the public** in understanding PAL permits, the Tennessee Department of Environment and Conservation (TDEC) joins the United States Environmental Protection Agency (EPA) in sponsoring a special Plantwide Applicability Limit (PAL) training workshop August 21-22, 2003 at the Fleming Training Center in Murfreesboro. EPA will conduct the workshop. The PAL permit program will be discussed, including flexible permitting as it pertains to Title V permits.

PAL is a voluntary program that provides facilities the opportunity to modify existing processes or add new processes without a lengthy major or minor New Source Review (NSR) procedure. This type of permit allows industry to make changes without the need for additional permits as long as the conditions of the PAL permit are met. Other benefits that come with the PAL program will be explained in detail at the workshop. The hours for the workshop are from 9:00 am to 5:00 pm on Thursday, August 21 and from 9:00 am to 1:00 pm on Friday, August 22. This workshop is free and open to anyone from the public or representatives from Tennessee industry.
